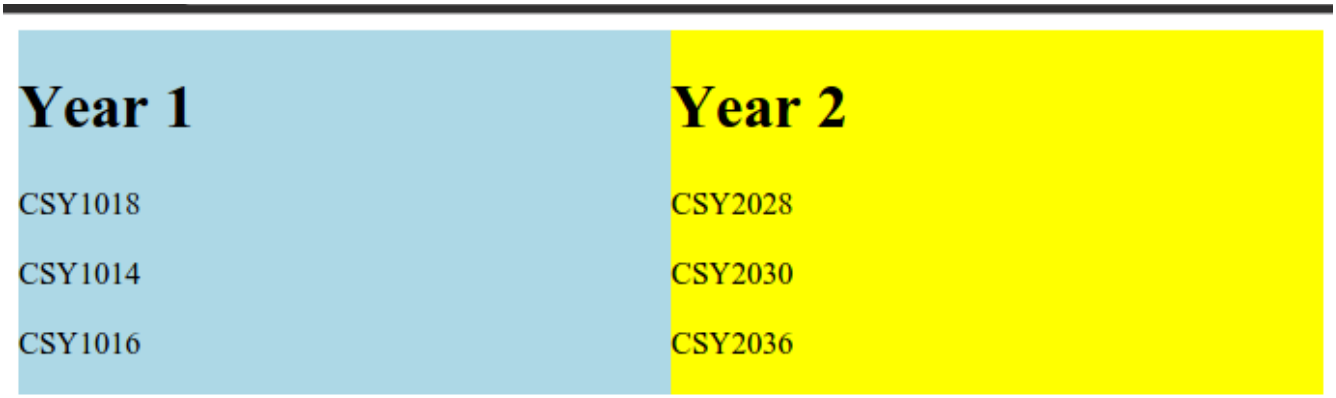
CSY2028 Lab Exercises
Week 1

1. Create a web page with two columns with a width of 50% each. In column 1 put all your first year modules, in column 2 put all your second year modules. You should give each column a background colour. It should look something like this:



Hint: You can use width: 50% to make columns that take up 50% of the width:

2. Using the following HTML, without modifying it, use CSS to make it appear as the supplied layout. You can choose your own colours but the layout (heading at top, footer at bottom, navigation on the left and main content in the middle) should be like the screenshot below

The navigation should be 20% wide and the main content area should be 80%

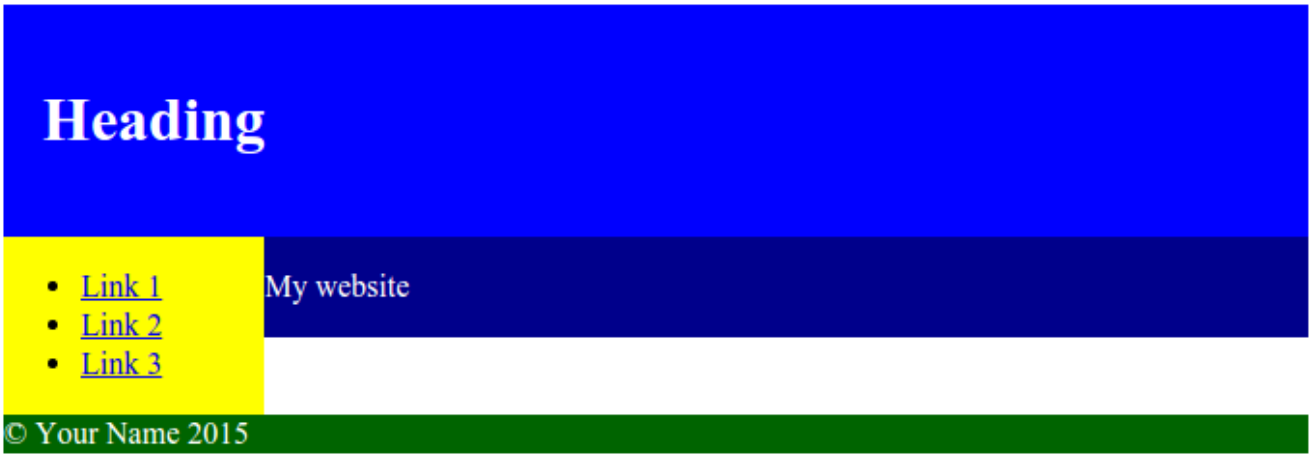
```
<!DOCTYPE html>
<html>
  <head>
    <title>My Web Page!</title>
    <link rel="stylesheet" href="demo.css" />
  </head>
  <body>
    <header>
      <h1>Heading</h1>
    </header>

    <nav>
      <ul>
        <li>
          <a href="#">Link 1</a>
        </li>
        <li>
          <a href="#">Link 2</a>
        </li>
        <li>
          <a href="#">Link 3</a>
```

```
        </li>
      </ul>

    </nav>
    <main>
      <p>My website</p>
    </main>

    <footer>
      &copy; Your Name 2015
    </footer>
  </body>
</html>
```



3. Change the above HTML to include a tag that represents a right hand column. Then adjust the CSS to make it appear like below:
